Hidden by darkness. Guarded by witches.
Discovered by a boy. Stolen by a king.
Whoever owns it will rule the world. Or

destroy it. We reach Disney's 25th animated feature, one of a number of titles ripe for rediscovery from the 1980s, a difficult time for Disney animation but a period when it employed some of the new wave of animators key to restoring its fortunes in the 90s. In this tale set many years ago, our hero Taran begins a quest to find the magical Black Cauldron but an evil king will stop at nothing to ensure that his mission fails.

The Great Mouse Detective

USA 1986. Dir Ron Clements, Burny Mattinson, Dave Michener & John Musker. With voices of Vincent Price, Barrie Ingham, Eve Brenner. 74min. **U**

Basil of Baker Street is the mouse equivalent of our own Sherlock Holmes, and his position as the Great Mouse Detective is threatened by the dastardly deeds of the devious Professor Ratigan. What begins as a mystery surrounding the disappearance of a toymaker leads to a deadly threat against the crown itself. Clements, Mattinson and Musker have all appeared on the NFT1 stage over the past year and this is another film where their potential is very clear, not long before *The Little Mermaid* turned their fortunes around.

Disney's re-imagining of *Oliver Twist* – with Oliver, a cat, and Dodger, a dog – has been overlooked by many because of the classic titles that directly followed it. But

there's plenty to enjoy here as we travel to New York and young Oliver dreams of living with young Jenny Foxworth but is cruelly set to work by Fagin and his gang who need to find enough money to pay off the evil Sykes. *Oliver & Company* marks the start of lyricist Howard Ashman's relationship with Disney, shortly before he teamed with Alan Menken on the score for *The Little Mermaid*.

The story of mermaid Ariel's huge sacrifice to be with the man she loves marks a massive turning point in the fortunes of Disney's

animated output at this time. With the winning combination of a classic fairytale, breathtaking animation and a great score by Alan Menken and Howard Ashman, the 28th film in 'The Disney 50' took over three times as much as its predecessor at the box office, not to mention the merchandising and other spin-offs. The next ten films from the Studio represent Disney's second golden age.

Orville the albatross is indisposed, so his brother Wilbur provides the transport overseas. This is the first traditionally animated Disney feature to use computer assistance in the form of CAPS (Computer Animation

Production System) and has a number of CGI touches throughout the film.

As they become closer, her father sets about trying to gather a mob together to break down the castle doors, attack the beast and rescue his daughter. The seamless blend of traditional and CGI animation, especially in the classic ballroom scene, set a new benchmark in what animation could achieve and *Beauty and the Beast* became the first full-length animated feature to be nominated for the Best Picture Oscar.
